

ACES Remote Inspection (ARI)

With mobile and smart devices inspections have never been so easy!

The inspections become interactive, increasing the overall efficiency of the process.

Just click on the link we send you, connect and start the inspection. No downloads or installations needed. **As simple as that!**

ARI is the cutting-edge App developed by the ACES R&D team. It opens the door to a revolutionary way to perform streaming remote surveys and inspections. Designed to allow participants from all over the world to remotely take part in an inspection process. The whole ACES network of inspectors, experts, and specialists are available to support clients as never before.

The implications of this method are extraordinary, enabling more comprehensive inspections of any kind of equipment.

Remote inspection can be tailored for any specific customer's need.

From vendor inspection activities to site or auditing, ARI is taking inspection to another level.
